LynxCap token overview

Token

Select the desired token for making the investment.

Tokens differ in lockup period and return. The longer the lockup, the higher the yield. Investments through tokens are back-to-back investments into Luxembourg listed bonds.

Investment flow

Each token represents token holder's ownership right on a specific bond issue with designated ISIN code.

Each bond is listed on Luxembourg stock exchange (EMTF Section) and can be located on www.luxse.com

see link to the LuxSE here

Bond proceeds are invested into real estate backed claim portfolios originated by commercial banks.

see bond program here

LynxCap manages such portfolios through network of servicers resulting in sale of real estates or rental income or scheduled payment for performing portfolios (cash collections)

Repayment

Cash collections are used to pay interest and principal to token holders (via bonds). Generated profit is used to buy more portfolios increasing amount of security available to token holders.
